

Respective client

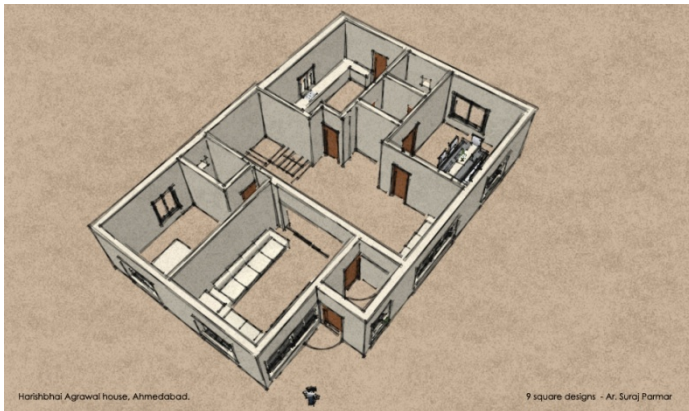

Hereby we give you the Design Schedule for "Interior Designing" of your space

### Stage I

Study of spaces to be designed and knowing the basic choice of client through "Client Requirement form" for Interior designing.

### Stage II

Preparing of rough sketches of interior spaces as per the feedback form filled by the client

Sample rough sketches

### Stage III

Developing themes of designing and concentrating on elements of design with maximum 3 options in 3D computer generated presentations.

### Stage IV

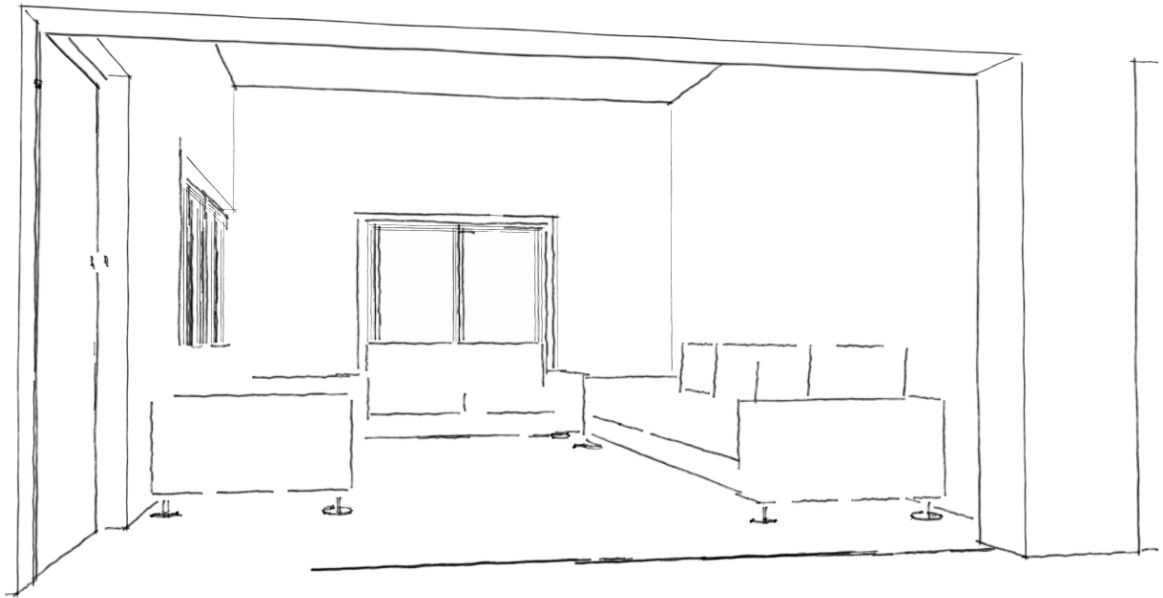

Developing and finalizing of elements of design and detailing of elements with Color Scheme and Lighting elements in computer generated presentations.

## Medium of Presentation :

### 3-Dimensional computer generated graphics

- Gives a complete overview of each and every corner to come up with lighting and colors
- Leaves least chances of errors in execution
- Helps in fast decision making
- Helps the layman labour agencies to understand the design properly
- Leaves no ambiguities regarding the possibilities of design
- The end result can be compared to presentation drawings.

A computer generated 3-Dimensional presentation produced during design proposal before execution

Exactly the same work produced in reality with the same details and finishes as presented during design proposal
